Monitors with EtCO2 from any reputed / well known OEM with sidestream technology as standard parameter that will be capable of low sampling rate of less than 60mL/min useful for Adult, Pediatric & Neonatal applications. EtCO2 sensor can be used on both intubated and non-intubated patients. The bidder should submit confirmation of verification and validation of the EtCO2 plug-in module. Also, should be upgradeable to AGM plug-in module. |                               |
